

DNV 2.7-1 WASTE COMPACTORS FOR RENTAL AND SALE

OEG's rental fleet of transportable waste compactors is certified to DNV 2.7-1 and provides a heavy-duty, fully pneumatic waste solution to offshore facilities management & oilfield service companies.

The offshore waste compactor is designed for use onboard offshore installations and vessels. The unit is powered using the platform's work air supply and can be loaded with waste materials that are placed into an integral hopper. The compactor can be returned to shore without any further handling where its contents are emptied and recycled or disposed of.

Equipment supplied meets the specific requirements of the latest international standards & approvals
DNV 2.7-1 / EN 12079 or
ISO 10855, SEPco, API, DOT,
CFR, ASME VIII DIV 1., IMDG,
ADR/RID & UK CAA CAP 43.

The robust design ensures simple and safe operation and the compaction capability of the unit reduces the cost of waste disposal and valuable storage space. The compactor is operated by air and designed for easy loading and unloading of waste. The unit is CE marked in accordance with European directives and certified for offshore lifting to DNV 2.7-1.

Air Driven Waste Compactor

KEY FEATURES

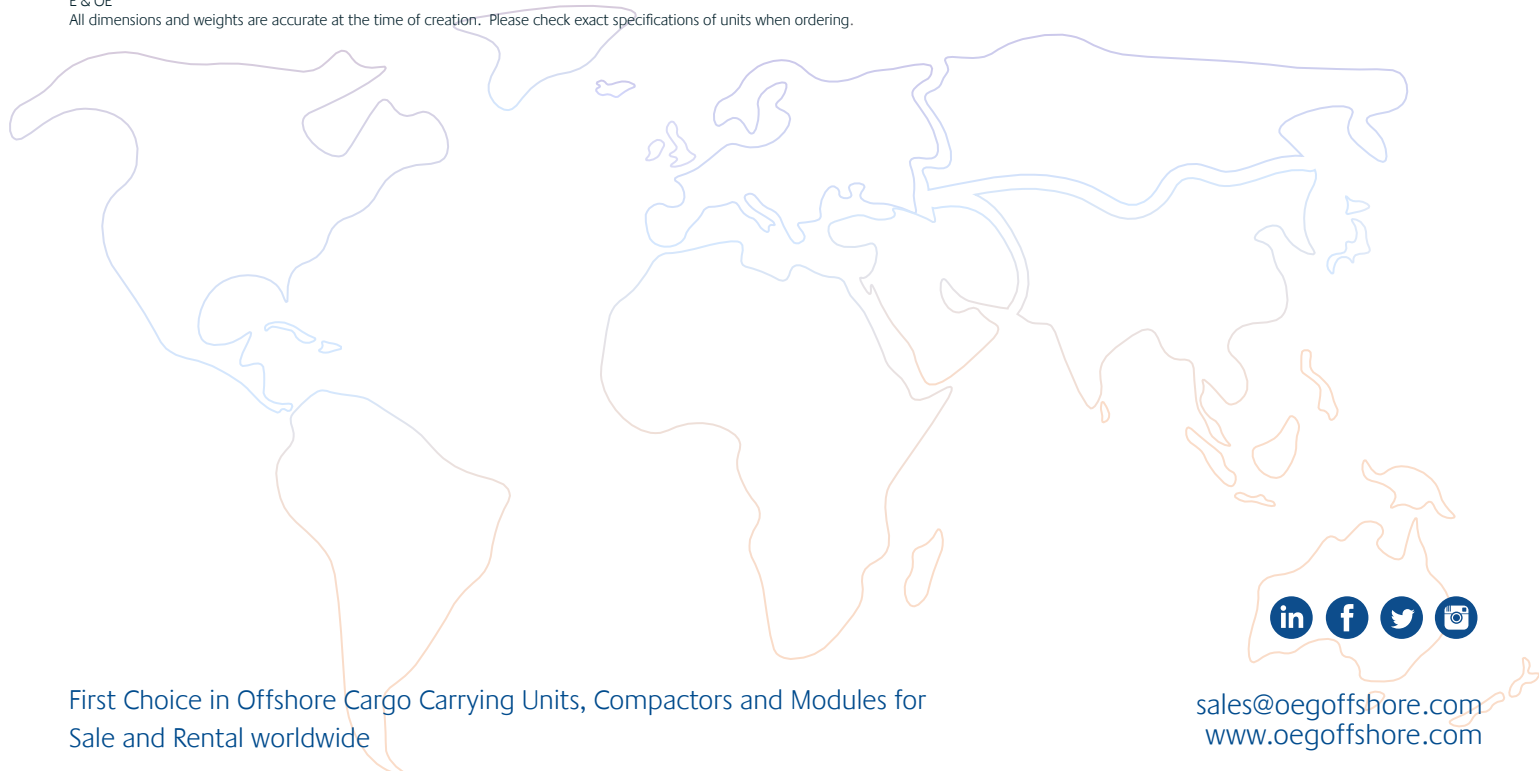

- Operational Air Supply Required Pressure: 7 bar, 3800 Litres per minute
- Maximum Operational Pressure: 7.5 bar
- Maximum Supply Air Pressure: 10 bar
- Skip vehicle lifting facilities fitted
- Anti-slip surfaces on roofs
- Forklift pockets for easy manoeuvring
- CE marking
- Designed, manufactured and fully certified to DNV 2.7-1 / EN 12079 standards
- Available for sale and rental
