

Well Completion Installation Solutions

RENTAL AND SALE OF COMPLETION INSTALLATION EQUIPMENT

OEG Offshore is an exclusive distributor of Blue Manta's packaged rental solutions to support completions and workover operations with standard and bespoke spooling units, sheave wheels, pressure test equipment and associated services.

OEG is uniquely positioned to deliver equipment required for deploying assorted lines (including control line, ESP cables and electric line) primarily on a rental basis. This includes spooling units, sheave wheels, cargo baskets and workshop containers, all of which are designed and manufactured to meet the latest industry standards.

Equipment supplied meets the specific requirements of the latest international standards & approvals.

DNV 2.7-1 / EN 12079 or ISO 10855

96" Spooler Unit

Spooler Air Pig Set up

Dual Spooler Unit

Well Completion Installation Solutions

Spooling Units are predominantly used to deploy lines and cables, including control lines and various electrical lines including ESP and gauge lines.

The units operate by creating back tension which stops the spool from free running and keeps the line tight.

All of Blue Manta's spooling units are manufactured and designed in accordance with DNV 2.7-1 and EN12079 standards and fully guarded to meet PUWER Regulations.

Units are available to suit drums from diameter 30" - 96", and have a range of accessories including hydraulic slip rings, electrical collectors, winder systems and remote control panels.

We can supply standard spooling units on a rental basis and also bespoke units designed to meet customer requirements.

Spooling units simultaneously deploying ESP, Chemical Injection, Gauge and SV - Norwegian Continental Shelf (2021)

TECHNICAL SPECIFICATION

Model No.	Maximum Drum Size			External Dimensions (mm)			Weights (kgs)		
	Dia	Width	Shaft	L	B	H	Tare	SWL	Gross
