

# First Choice for Offshore Aviation Services to UK CAA CAP 437

OEG Offshore are leading suppliers of helideck audits & inspections, helicopter refuelling systems & training and Jet A-1 fuel tanks to UK CAA CAP 437.

## Offshore Helicopter Refuelling System Audit Inspections

We can offer 3, 6 and 12 monthly periodic audit inspections of Offshore Helicopter Refuelling Systems in compliance to UK CAA CAP 437 on a worldwide basis. Helifuel services include commissioning, testing and maintenance of offshore systems and components to UK CAA CAP 437.

## Helideck Audit Inspections

Provision of periodic inspections of offshore helidecks to the

UK CAA CAP 437 standard, Australian CAAP 92-4 and relevant Dangerous Goods regulations are frequently carried out by OEG Offshore inspectors on installations and vessels.

OEG also offer Helideck Surface Friction Testing for offshore helidecks to verify compliance with UK CAA CAP 437 ch.3.7 recommendations for the safe removal of a helideck landing net. This is carried out using a specialist GA Micro Tester to measure the overall friction co-efficient of the helideck surface.

## Dedicated & Experienced Team

Our approved inspectors and service teams are available for global deployment and have over 20 years experience in offshore aviation products and services.

## REFUELLER OPERATOR TRAINING

Training can be provided for offshore re-fuelling personnel to world's best practices.

OEG provide practical, 'hands on' training based on our many years of experience and knowledge of worldwide offshore rules and regulations including UK CAA CAP 437, Australian CASA and APPEA.

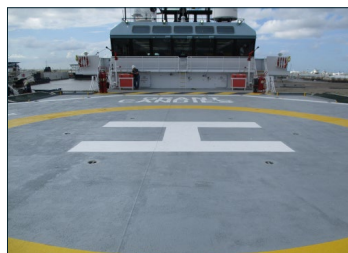

The focus of our course is to enable the Offshore Helicopter Refuelling System Operator has all the competencies required to safely and efficiently deliver clean fuel to helicopters.

# First Choice for Offshore Helifuel Systems & Jet A-1 Fuel Tanks

## JET A-1 FUEL TANKS

Helifuel tank designs are robust and fully compliant to DNV 2.7-1 / EN 12079 or ISO 10855 and offshore aviation standard UK CAA CAP.437.

Available in 2,900L, 2700L, 4,000L, 4,200L and 4,500L capacities with key safety features as standard.

Fitted with industry standard 2½" Dry-Break Discharge Couplings to minimise the risk of leakage and cross contamination of product.

Standard features: vacuum and pressure relief valve & level indicator (Bayham).

Fire Deluge Bunds are also available.

Vertical Jet A-1 Fuel Tanks

Horizontal Jet A-1 Fuel Tanks

Approvals: ADR/RID, DNV 2.7-1 / EN 12079, IMDG, ASME.VIII-1, PED and CAP 437 compliant.

## OFFSHORE HELIFUEL SYSTEMS & MAINTENANCE

- Complete packages for sale or rental.
- System components include fuel dispensing unit, separator filter & pump unit.
- Fully compliant to UK CAA CAP 437.
- System configuration to suit customer requirements.
- Offshore rated transportable helifuel tanks available as part of the system for sale or rental.
- Service, inspection & maintenance of refuelling systems & all serviceable parts.
- Full range of spare parts and fuel sampling equipment.
- Custom design & fabrication of integrated helifuel systems.

First Choice in Cargo-Carrying Units, Transportable Tanks, A60 Cabins  
and associated services worldwide for Sale and Rental
