

# First Choice for Fluid Handling & Storage Solutions

OEG Offshore's highly diversified and expanding global fleet of transportable offshore tanks are available on a sale or rental basis.

They are suitable for the storage and transportation of an extensive range of products including chemicals, oils, helifuel, liquid gas and acids.

OEG's standard fleet includes T4, T7, T11 & T14 UN portable tanks approved under IMDG / ADR / RID to suit a variety of products.

Chemical tank capacities range from 1,100 Litres through to 20,000 Litres in a variety of vertical and horizontal tank designs.

We offer 10ft and 20ft Cryogenic tanks, constructed for the rigorous demands of the oil industry where they are used for the transportation and storage of liquid gas. Tanks are type approved IMO (T75), ADR, RID, TIR.

We can also supply Intermediate Bulk Containers (IBCs) with or without DNV 2.7-1 lifting frames for general low hazard chemicals.

In addition, our fleet of IMI 101 Liquid Transport Tanks are available from our network of bases in the US Gulf Coast and in Mexico.

OEG's transportable offshore tank range is designed and manufactured in accordance with DNV 2.7-1 / EN 12079 or ISO 108855. We are committed to providing high quality fluid handling and storage solutions to our customers from our global base network.

## Tank Types for Different Products

- Sale and Rental of DNV 2.7-1 Chemical, Multi-Cargo, Helifuel, Acid, Cryogenic, IBCs and ISO tanks.
- IBC tanks suitable for coolants, oils and general low hazard chemicals such as MEG.
- Acid tanks available with a range of linings to suit corrosive liquid transportation and storage.
- Cryogenic tanks capable of carrying Liquid Nitrogen, Oxygen and Argon. Withholding period of 25 days plus.
- Helifuel tank approvals include ADR/RID, DNV 2.7-1 / EN 12079, IMDG, ASME.VIII-1, PED and CAP 437 compliant.

# First Choice for Chemical Bulk Storage Services & Logistics

OEG Offshore provide state-of-the-art facilities and large-scale capacity to service customer's bulk liquid storage, transport and transfer needs efficiently, safely and cost-effectively. The focus is on quality and continual monitoring to ensure compliance with industry safety and environmental standards.

Operations are certified to ISO 9001:2008, ISO 14001:2004 and AS/NZS 4801:2001 & OHSAS 18001:2007.

Facilities include:

- 4 x 100,000 Litre self-bunded tanks
- 4 x 150,000 Litre bunded tanks
- Bottom Load Dispensing Systems
- Calibrated meters
- Scully Overfill Protection systems
- Transport - Road / Rail / Sea

- Compliant dangerous goods facility available for lease / hire
- Compliant storage and distribution services available from yard
- Onshore bulk storage, handling and dispensing of Jet A-1 fuel

## Chemical Storage, Handling & Transportation

- Large volume storage capabilities in key strategic oilfield supply base locations.
- Storage tanks ranging from 20,000 Litre to 150,000 Litre capacity with high flow dispensing and metering facilities for rental.
- Bulk liquid logistic services.
- Decanting, blending and repackaging services.
- Expertise in Dangerous Goods.
- Sale and Rental of DNV 2.7-1 Chemical, Helifuel, IBCs, Cryogenic, Acid and ISO tanks.

First Choice in Cargo-Carrying Units, Transportable Tanks, A60 Cabins and associated services worldwide for Sale and Rental
