Client Ex Register Management Services

# A60 Engineering Cabin Maintenance & Servicing

With over 25 years experience in managing and maintaining our own fleet of A60 engineering cabins, we have a unique combination of skills and expertise that allows us to offer comprehensive cabin maintenance, refurbishment and servicing.

This service can be provided on an ad-hoc basis for the servicing or refurbishment of a single cabin or we can provide a turnkey fleet management service that allows you to concentrate on core activities in the knowledge that your fleet is in safe hands.

Our fleet management service is based upon a planned, fixed-price, long term programme which covers routine cabin maintenance, agreed upgrades or refurbishments, regular servicing, ongoing compliance with regulatory codes and full on-line certification.

For some customers refurbishment or upgrading an A60 cabin or A60 module is a cost effective solution to a new build modular solution.

It can also offer lead time advantages where project deadlines are critical. Our refurbishment team have successfully completed hundreds of module upgrades and refurbs over the years which can range from;

- Replacement A60 doors & hatches
- Interior wall repairs
- Structural repairs and painting
- Flooring repairs or replacement
- Roller paint or full blast & paint with corporate logos and decals
- Upgrades to Norsok Z-015 standard & DNV 2.7-2 standard
- Complete furniture refit and reconfigure
- Upgrades from safe area to Zone 2 hazardous area
- Installation of air conditioning
- Adding A60 cable transits, A60 windows, doors and hatches

Further options include spare part support, damage waiver cover, ISO connectors and hook-up cable, provision of stairs and platforms as well as assistance with transportation and offshore installation and hook-up.

## CALL TO BOOK YOUR INSPECTION
