

First Choice for Sale & Rental of Offshore Mud Cutting Skips

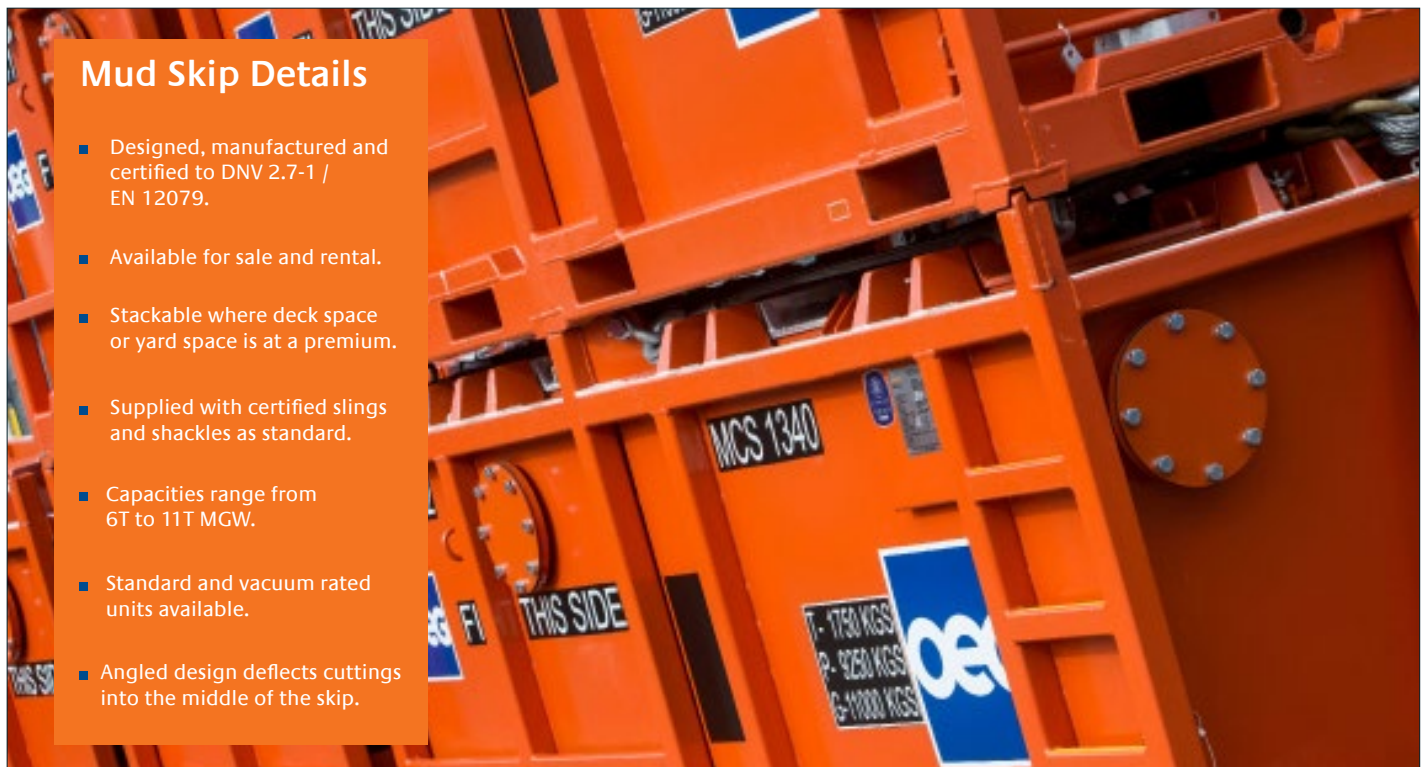

OEG supply a comprehensive range of Mud Cutting Skips for the safe containment and transfer of waste produced from offshore drilling and completion processes.

Our units are designed, manufactured and certified in accordance with ISO10855 or DNV 2.7-1 / BS EN 12079 and our US Gulf of Mexico fleet is DOT 49 CFR compliant and SEPco OPS0055 certified. Standard mud skips available for immediate rental include 6T, 7.5T and 11T MGW capacities. Custom units can be designed by our project team to suit customer's exact requirements. All mud skips are supplied with certified slings & shackles as standard and are stackable.

Safety features such as aluminium lightweight lids for safe and easy opening / closing are incorporated as standard.

First Choice for standard & custom Offshore Skips

Offshore skips are primarily used for the safe and efficient transportation and storage of general waste from oil and gas platforms and vessels back onshore for disposal.

OEG Offshore's range of waste skips are designed, manufactured and certified in accordance with ISO 10855 or DNV 2.7-1 / EN 12079.

They are supplied with certified slings and shackles as standard and can be stacked where space is restricted.

Offshore skip designs available for sale and rental include boat skips, box skips, Front End Loading (FEL) skips, and Quick Discharge waste bins as well as custom designs to suit deckspace and type of waste.

For rates and availability please e-mail: sales@oegoffshore.com
