

First Choice for DNV Approved Workshop & Stores Containers

OEG Offshore's workshop container range has been designed, manufactured and certified in accordance with DNV 2.7-1 / EN 12079 or ISO 10855. Sale and rental available.

Units are supplied with a certified lifting assembly as standard and are stackable, if required. The base has integrated forklift pockets for ease of yard loading and offloading. Units are also supplied with a cargo door net and the internal walls can be fitted with unistrut to allow quick change out or addition of equipment. Where deck space and crane capacity is limited try our fully equipped 6ft mini workshops / tool containers.

As well as general use workshops we have designed and delivered rigging lofts, electrical shops, tool stores, testing workshops, ROV stores containers, instrument / testing stores & specialist paint stores.

Our design team are experts in the configuration and build of customised workshops and stores for both sales and rental contracts. We regularly offer bespoke design or specific modifications as the most effective solutions for specialist applications.

Options include EX certified electrical equipment suitable for use in hazardous areas offshore.
